Elizabeth Ortiz Design

About Elizabeth Ortiz

Elizabeth is a global entrepreneur and leader in the custom art and finishing industries. As a designer, artist and sculptor, she has been providing services to top architectural and interior design experts as well as a who's who of celebrities and business leaders.

Born into a family of successful artists and designers, she is originally from Santa Fe, New Mexico – a region known for its rich blend of traditional and contemporary art. Her grandmother founded Nambé Mills, a company which grew to produce high-end home accessories now sold worldwide in stores like Bloomingdales, Macy's and other "A" stores. Her parents also owned art galleries and foundries, which produced the works of many well-known artists.

After moving to Los Angeles in 1998, Elizabeth's work caught the eye of the Beverly Hills and global design community. She soon began to receive commissions from some of the world's leading architects and interior designers.

As a sculptor and painter, she was trained in various media and techniques from a young age, and her talents evolved under the tutelage of renowned artists and design professionals. Today, she is known for her innovative artistic approach, which combines traditional wall finishing techniques with modern designs.

Elizabeth currently resides in Salzburg, Austria.

Custom Interior Art

Elizabeth Ortiz has made it her mission to enhance living spaces with impressive and unique works of art. The paintings are high-end, but affordable and can be adapted to individual wishes.

Simply select a piece from the catalog or ask for custom artwork that fits perfectly into your interior design concept.

Sizes & frames

Depending on the materials you choose, different sizes, frames and mats are available. The pieces can also be hung without a frame. The artwork can optionally be created on canvas, thin canvas boards, wood or aluminum.

Colors & materials

Every piece can be customized to match your interior design style. Popular choices include real marble plasters, Mica metallic plasters, gold and silver leaf, metallic paints as well as acrylics and oils.

Designs

From abstract art, to birds, flowers and patterns or shapes: A variety of designs are available. On request, Elizabeth can also match and recreate designs from wallpapers and fabrics or stone, tile and wood.

Marble Collection

Organic textures –sometimes rough, sometimes ultra-smooth – have inspired the marble collection.

Genuine marble plasters, from Carrara to Marmorino, give the pieces an authentic stone look and feel somewhere between lightness and substantiality.

As classic materials interpreted anew in a fresh and modern style, these pieces instantly add an air of elegance and sophistication to their environment. At the same time, the stone creates a natural texture that seems to have a life of its own – a sincerity and spontaneity one never tires of looking at.

Two-tone Marmorino marble plaster

Metallic Collection

Designed to play on the natural light in the room, the metallics collection combines a variety of materials from gold leaf to Mica crystals.

The dynamism that naturally arises from the reflective nature of these materials is often highlighted by an underlying texture created with genuine marble plasters or the skillful application of the material itself.

By capturing the light in the environment at different angles, the artwork remains infinitely interesting to its observer.

Metallic Collection

Sericum

Textured marble plaster with transparent mother of pearl sealer

Inlustris

Marble plaster with metallic paint

Augmentum

Color Collection

The Color Collection is a vibrant and dynamic collection of colorful abstract artworks – consisting of two distinct series: the Modern Romanticism Series and the Color Burst Series.

Bold and expressive or nuanced and multi-layered, the works invite the viewer to explore their subtleties.

The Modern Romanticism Series is characterized by its unique use of color, reminiscent of paintings from the Romantic period. Each work in this series celebrates the individual experience of nature, evoking a sense of freedom and spontaneity.

The Color Burst Series is a vibrant and energetic collection of abstract pieces where colors come together in a dazzling display of creative energy. These artworks stand out with their dynamic compositions.

Modern Romanticism Series

Stellae

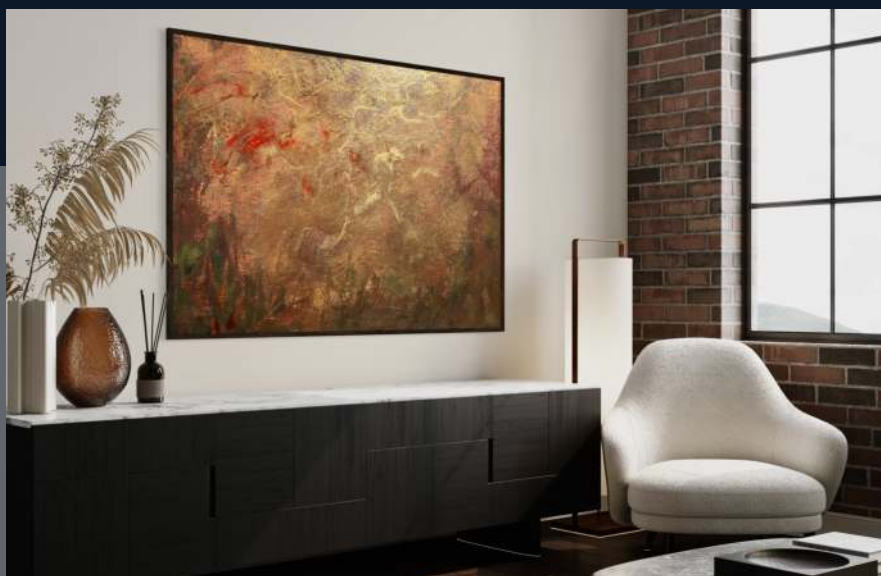

Embedded acrylic paints and metallic powders on canvas
